Tradizione e innovazione

Da 40 anni, nel distretto tecnologico di Tecnocity alle porte di Torino, progettiamo e produciamo due linee complete di box e cabine doccia in acciaio e in alluminio. Ci ispiriamo al modello industriale 4.0, sviluppiamo cioè una **produzione industriale seriale customizzata**.

Tradition and innovation

*For 40 years, in the Tecnocity technological district at Turin's doors, we have been designing and producing two complete lines of shower enclosures in steel and aluminium. We are inspired by the industrial model 4.0, so we have developed a **customised industrial serial production**.*

**IL NOSTRO DNA,
LA NOSTRA STORIA,
LA NOSTRA PRODUZIONE:**

**OUR DNA, OUR STORY,
OUR PRODUCTION:**

100% MADE IN ITALY

Garantiamo un prodotto di serie eccellente e una produzione sartoriale per un design su misura

We guarantee an excellent standard product and a tailor-made production for a bespoke design

Alta qualità e know how: anche nel settore nautico

L'abilità di soddisfare le particolari esigenze di ogni tipo di cliente ha permesso una costante collaborazione con importanti marchi della nautica italiana. Ogni box viene realizzato seguendo le linee dello scafo di ogni barca, adattandosi perfettamente alle pareti interne.

È un settore in continua crescita, con lo studio di particolari sempre più innovativi ed eleganti, per ambienti molto raffinati come quello degli yachts. Nonostante gli spazi, vengono realizzati box doccia con cristalli da 8 mm e telai in acciaio inox per uno stile minimalista e ricercato.

High quality and know how: nautical sector too

The ability to satisfy the specific requirements of all client types has made a steady collaboration possible with important brand-names of the Italian yachting industry. Each enclosure is designed following the hull lines of each boat, adapting perfectly to the interior walls.

This is a continually developing sector, with the study of increasingly innovative and elegant details for the very refined ambiances such as those found on yachts. Despite limited spaces, shower enclosures are created with 8mm glass plates and stainless steel frames for a style that is both minimalist and refined.

CSA, per un design sostenibile

CSA progetta e costruisce box doccia a basso impatto ambientale.

- I profili di acciaio e di alluminio utilizzati, provengono tutti da filiere industriali che utilizzano materie prime di alta qualità la cui origine è certificata. A garanzia di totale non contaminazione da materiali di recupero la cui provenienza non è verificabile.
- Per l'alluminio, la verniciatura è solamente a polvere, in linea con la nostra politica di ecosostenibilità, data la mancata emissione di solventi nelle acque di scarico e il recupero totale delle polveri utilizzate nelle lavorazioni.
- I vetri totalmente lavorati da materiale riciclato.
- Il trattamento anticallcare, applicato sui vetri, è frutto dello studio e della ricerca effettuati da un primario laboratorio chimico, certificato e noto per i suoi prodotti "a basso impatto ambientale".
- Le guarnizioni, formate da materie prime difficilmente attaccabili da funghi, muffe o spore; evita le striature nere sui profili e, principalmente, evita problemi di allergie alle persone maggiormente sensibili.
- L'imballo ha un basso impatto ambientale: quello esterno è composto da cartone ondulato e preformato, quello interno in alveolare, per una maggior protezione in caso di urti accidentali. Inoltre, per immobilizzare il prodotto al suo interno vengono utilizzate fasce avvolgenti in carta crespa.

L'insieme di queste attenzioni, ci permette di offrire un prodotto sicuro e responsabile verso l'utilizzatore finale, un prodotto ecosostenibile frutto della filosofia CSA.

CSA, for a sustainable design

CSA designs and builds low Environmental impact shower enclosures.

- *The stainless steel and aluminium profiles we use come from the largest industries in the business all using top quality raw materials whose origin is certified, that's how we guarantee total non-contamination from materials whose origin is not verifiable.*
- *For the aluminium, we only powder coat, in line with our eco-sustainability policy, as no solvents are emitted into the wastewater and there is a total recovery of the powders used in the processes.*
- *The glasses totally worked from recycled material.*
- *The anti-limescale treatment applied on the glass is the result of the study and research carried out by a primary chemical laboratory, certified and known for its "Low environmental impact" products.*
- *Seals, formed from raw materials that can hardly be attacked by mold or spores; avoid black streaks on the profiles and, most important, avoid allergy problems to the most sensitive people.*
- *The packaging has a low environmental impact: the external one is composed of corrugated and preformed cardboard, that internal honeycomb carton, for greater protection in case of accidental impacts. In addition, to immobilize the products inside the box are wrapped in crepe paper.*

The combination of these attentions allows us to offer a safe and responsible product towards the final consumer, an eco-sustainable product son of the CSA philosophy.

I vantaggi di scegliere un box doccia firmato CSA

The advantages of choosing a CSA shower enclosure

5 YEARS
GUARANTEE

ESTENSIONE DI GARANZIA

CSA estende la garanzia da 2 a 5 anni su tutti i **box doccia** che vengono installati dal proprio Centro Assistenza Tecnica! Per maggiori specifiche, vedi "condizioni di estensione garanzia" sull'anta di copertina.

WARRANTY EXTENSION

*CSA extends the warranty from 2 to 5 years on all the **shower enclosures** that are installed on their own Technical Assistance Center! For more specifications, see "conditions warranty extension" on the cover.*

CERTIFICAZIONI

Garantiamo la qualità e la sicurezza dei nostri prodotti grazie alla collaborazione con istituti di prova e di certificazione.

CERTIFICATION

We guarantee the quality and safety of our products thanks to the collaboration with test and certification institutes.

TRATTAMENTO ANTICALCARE PER VETRI E METALLI

CSA impiega un innovativo trattamento idrorepellente "easy clean" che utilizza un'avanzata nanotecnologia brevettata made in Italy, applicabile sia sulle superfici vetrose che sui profili. Il prodotto forma sulla superficie un sottile strato di protezione che si lega chimicamente ai vetri e ai profili sigillandoli. Nel corso del tempo la superficie trattata sarà più facile da pulire e più resistente a vari tipi di sollecitazioni chimiche.

Il trattamento garantisce le seguenti caratteristiche:

- facilità di pulizia su vetri e metalli;
- stabilità ai raggi UV;
- protezione extra contro i depositi di calcare e sapone;
- aumento del 20% di brillantezza della superficie trattata.

*Il trattamento non deve essere considerato un prodotto per la pulizia del vetro, ma riduce in maniera significativa la quantità di deposito di calcare sulla superficie stessa.

ANTI-LIME TREATMENT FOR GLASSES AND METALS

CSA uses an innovative "easy clean" water repellent treatment that uses advanced patented made in Italy nanotechnology, applicable both on glass surfaces and on profiles. The product forms a thin protective layer on the surface which is chemically bonded to the glass and profiles, sealing them. Over time, the treated surface will be easier to clean and more resistant to various types of chemical stress.*

The treatment guarantees the following characteristics:

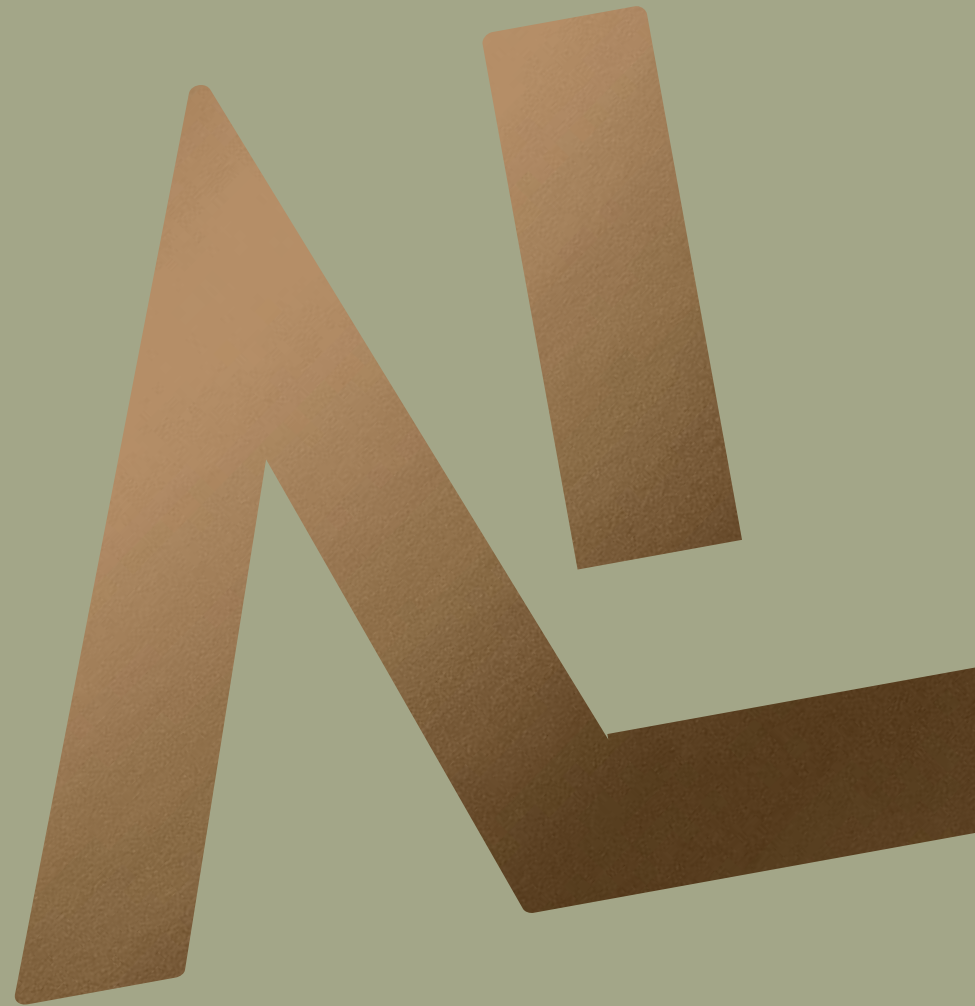

- ease of cleaning on glass and metals;
- UV stability;
- extra protection against limescale and soap deposits;
- 20% increase in brightness of the treated surface.

**The treatment should not be considered a product for cleaning the glass, but it significantly reduces the amount of limescale deposits on the surface itself.*

Un box doccia, due funzioni

Le soluzioni ALICE H.2FB e H.A2FB sono progettate per soddisfare le esigenze di chi vive insieme a persone con disabilità di movimento. Questi modelli sono studiati per rendere più sicuro e piacevole il momento del bagno, infatti, quando la maniglia è sganciata le ante della parte superiore si aprono **A**, donando uno spazio aperto per migliorare la funzionalità e l'assistenza. Quando, invece, la maniglia è agganciata il box doccia può essere utilizzato normalmente **B**.

One shower enclosure, two functions

*The ALICE H.2FB and H.A2FB solutions are designed to meet the needs of those who live with people with mobility disabilities. These models are designed to make the bathing moment more secure and enjoyable, as when the handle is released, the top doors open **A**, giving an open space to enhance functionality and service. When, on the other hand, the handle is hooked up the shower can be used normally **B**.*

PIATTI DOCCIA TOUCHSTONE

TOUCHSTONE SHOWER TRAYS

L'anima della nuova generazione di piatti doccia è costituita dal Mineralsolid®, una vera innovazione nel campo degli articoli sanitari.

Il Mineralsolid® è un materiale composito formato da cariche minerali naturali e resine. È rivestito da uno smalto tecnico ad effetto estetico opaco. Questo rivestimento (800-1000 um) consente ottime caratteristiche di resistenza (a scalfitture, abrasioni e macchie). Le texture sono modellate in modo da evitare il ristagno dell'acqua, permettendole di confluire immediatamente nello scarico ispezionabile.

In fase di lavorazione viene sottoposto a trattamenti superficiali che ne esaltano sia le caratteristiche estetiche che quelle tecnologiche, dando vita a piatti doccia che hanno uno spessore di 3 cm, e una volta posati possono dare un continuum con il pavimento del bagno.

The soul of the new generation of shower trays is made up of Mineralsolid®, a true innovation in the field of sanitary ware.

Mineralsolid® is a composite material made up of natural mineral fillers and resins. It is coated with a technical glaze with an opaque aesthetic effect. This coating (800-1000 um) allows excellent resistance characteristics (scratches, abrasions and stains). The textures are modeled in order to avoid water stagnation, allowing it to flow immediately into the inspectable drain.

During the processing phase, it is subjected to surface treatments that enhance both its aesthetic and technological features, giving life to shower trays that are 3 cm thick, and once laid they can give a continuum with the bathroom floor.

ARDESIA ANTRACITE, 70x90 cm

Qualità tecniche

Technical qualities

Applicazioni / Applications

- Piatti doccia / Shower trays

Installazione / Installation

- Appoggio / Support
- Filo pavimento / Floor level
- Rialzato / Half drowned in floor

Caratteristiche / Features

- Spessore piatti doccia H 3 cm / Shower tray thickness H 3 cm
- Dimensioni standard e su misura / Standard and customized sizes
- Piatti rettangolari, quadrati e semicircolari / Rectangular, square and semicircular dishes

- Made in Italy

Proprietà / Property

- Resistente ai prodotti chimici / Resistant to chemicals
- Resistente alle variazioni di luce / Resistant to light variations
- Batteriostatico / Bacteriostatic
- Antiscivolo / Anti-slip
- Riparabile / Repairable
- Scarico efficiente / Efficient drain

Normative / Regulations

- L'intera collezione Touchstone è marchiata CE conformemente alle direttive europee secondo la norma UNI EN 14527:2010.

The entire Touchstone collection is CE marked accordingly to the European directives according to the UNI EN 14527:2010 standard.

Plus e principali vantaggi dei prodotti Touchstone

Plus and main advantages of Touchstone products

ANTIMACCHIA

Grazie ai trattamenti superficiali a base di prodotti nanotecnologici tutte le superfici TOUCHSTONE hanno caratteristiche antimacchia e sono facili da pulire.

STAIN

Thanks to the surface treatments based on nanotechnological products, all TOUCHSTONE surfaces have stain-resistant characteristics and are easy to clean.

RESISTENTE & DURATURO

Le ottime caratteristiche meccaniche e le buone proprietà chimico-fisiche, rendono questo prodotto particolarmente resistente all'urto, secondo la norma UNI 10442:1995. Per questi motivi risulta duraturo nel tempo.

RESISTANT & DURABLE

The excellent mechanical characteristics and good chemical-physical properties make this product particularly resistant to impact, according to the UNI 10442: 1995 standard. For these reasons it is long lasting.

Finiture e colori

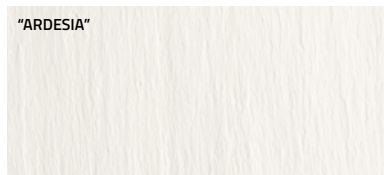

Finishes and colors

La superficie in Touchstone è disponibile a scelta in due diverse finiture. Le due diverse finiture hanno determinate colorazioni disponibili, offrendo così una maggiore personalizzazione del bagno.

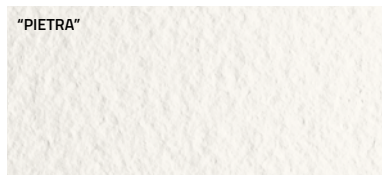

The Touchstone surface is available in two different finishes. The two different finishes have certain colors available, thus offering greater personalization of the bathroom.

DECORAZIONE SABBBIATA SANDBLASTED DECORATION

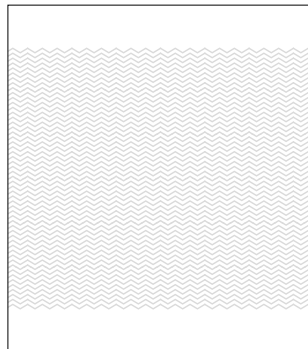

La decorazione sabbiata è un ottimo mezzo per abbellire i vetri del box e allo stesso tempo celare la vista dell'interno della doccia. Il disegno viene inciso nel vetro creando un elegante effetto satinato. I decori sono inalterabili nel tempo e garantiscono una personalizzazione del box doccia di gran classe. **La realizzazione delle decorazioni su vetro va sempre consigliata dall'ufficio tecnico e posizionata correttamente in base alle caratteristiche e alle dimensioni del modello.** Inoltre, in alcuni casi, vi è la possibilità di applicare una strip led al box doccia, che illumina il disegno creando uno straordinario effetto coreografico.

*The sandblasted decoration is a great way to embellish the enclosure glass whilst simultaneously concealing the view of inside the shower. The design is engraved on the glass, creating an elegant satin effect. The decorations are unalterable over time and guarantee a high class personalisation of the shower enclosure. **The creation of decorations on glass must always be recommended by the technical office and positioned correctly according to the characteristics and dimensions of the model.** Additionally, if an LED strip is applied to the shower enclosure glass, the design illuminates creating an extraordinary choreographic effect.*

STAMPA DIGITALE SU VETRO DIGITAL PRINTING ON GLASS

La stampa digitale è una tecnologia che rappresenta la soluzione più evoluta per riprodurre fotografie, disegni e scritte, direttamente sulle lastre di vetro, permettendo così una personalizzazione unica del proprio box doccia. Il cliente potrà oggi selezionare personalmente l'immagine da riprodurre in alta definizione, dal sito adobestock.com e **comunicarla all'ufficio tecnico che ne verificherà la fattibilità** e il posizionamento nel rispetto delle dimensioni delle lastre. La tecnologia di stampa digitale utilizzata da CSA fa uso di vernici resistenti ai graffi, ai raggi UV e ai prodotti utilizzati per la pulizia dei vetri, garantendo così l'indelebilità dell'immagine nel tempo. Questa tecnica non è applicabile ai box doccia semicircolari. Di seguito alcuni esempi dimostrativi.

*Digital printing is an advanced technology that allows printing images, drawings and writings directly on the glass. A customer can select personally an image in high definition from the website adobestock.com and **contact our technical department to check the feasibility** and positioning in compliance with the glass dimensions. We use coatings resistant to scratches, UV rays and cleaning products to guarantee the durability of images. This technique is not applicable to semicircular shower cubicles. Here are some examples.*
